Case History

In 2026, a class action lawsuit was filed alleging the Defendants contracted, combined and conspired to reduce the domestic supply of dairy products by shipping those products overseas, which allegedly artificially inflated U.S. prices in violation of state consumer protection and federal antitrust laws. It is impossible to predict the outcome, but money may become available to eligible class members if the class is certified and a settlement is reached with the Defendants in the future. FRS will update this Class Action Summary as the case progresses and new information becomes available.

If a monetary settlement is obtained, information about it will be available from Class Counsel. You also may visit the Court-approved website once one is established.
Please understand that you have the right to file on your own if and when there is a monetary settlement.
