Case History

In 2022, numerous class action lawsuits were filed alleging the Defendant engaged in an anticompetitive scheme to withhold from customers and independent repair providers certain repair tools for Deere Large Agricultural Equipment, which led customers to pay more for Repair Services than they would have in a fully competitive market. Since then, the class has reached a settlement with the Defendant in the amount of \$99 million as well as other non-monetary relief. The settlement is pending final approval. The settlement funds will be distributed if and when final approval is granted and after completion of a claims process.
