CLASS ACTION SUMMARY

ANTITRUST CLASS ACTIONS**

Case History

In 2024, class action lawsuits were filed alleging the Defendants engaged in a combination or conspiracy to fix, raise, maintain or stabilize the price of crude oil and/or gasoline and diesel fuel in the United States in violation of federal antitrust, state antitrust and consumer protection laws. It is impossible to predict the outcome, but money may become available to eligible class members if the class is certified, and settlements are reached with one or more of the Defendants in the future. FRS will update this Summary as the cases progress and new information becomes available.

If a monetary settlement is obtained, information about it will be available from Class Counsel.

You also may visit the Court-approved website once one is established.

Please understand that you have the right to file on your own if and when there is a monetary settlement.
