Definition of "HDD Suspension Assemblies":

HDD Suspension Assemblies are a critical component of HDDs, which are incorporated into electronic devices, such as desktop computers, laptops, gaming consoles, printers, copy machines and MP3 players, or sold as stand-alone storage servers. Case History

Since 2019, civil claims were filed in various provinces in Canada alleging the Defendants conspired to fix, maintain, increase and/or stabilize the price of HDD Suspension Assemblies sold in Canada in violation of Canadian antitrust laws. The litigation is ongoing at this time. It is impossible to predict the outcome, but money may become available to eligible class members if settlements are reached with the Defendants in the future. This Summary is subject to change as the litigations progress.

If a monetary settlement is obtained, information about it will be available from Class Counsel. You also may visit the Court-approved website once one is established. Please understand that you have the right to file on your own if and when there is a monetary settlement.
