CLASS ACTION SUMMARY

**INVISALIGN INDIRECT PURCHASER
ANTITRUST CLASS ACTION SETTLEMENT**

Case History

In 2021, a class action lawsuit was filed in the Northern District of California alleging the Defendant monopolized the aligner (orthodontic devices that, in essence, are a plastic form of braces) market, which resulted in artificially raised prices and reduced competition in the market for aligners in violation of federal and state antitrust laws. It is impossible to predict the outcome, but money may become available to eligible class members if the class is certified and a settlement is reached with the Defendant in the future. FRS will update this Summary as the case progresses and new information becomes available.

Class Counsel or the Settlement Administrator may be contacted for additional settlement information. You also may visit the Court-approved website once one is made available. Please understand that you have the right to file on your own if and when there is a monetary settlement. To learn more about our services, visit www.FRSCO.com.
