Antitrust Class Action**

*This is not an official Court Notice. Information contained in this Summary is subject to change.
There is no monetary settlement at this time.*

If you or your business in the United States directly purchased Invisalign Aligners and/or iTero Scanners on or after **March 15, 2015**, an antitrust class action lawsuit alleging price fixing may affect you.

Eligible Class Members: If certified, eligible Class Members are all persons and entities in the United States (excluding all federal or state government agencies or agencies) who or which, from March 15, 2015 to the present, purchased "Invisalign Aligners" and/or "iTero Scanners" (both defined below) **directly** from Align Technology, Inc. (the "Defendant" or "Align").

Definition of "Invisalign Aligners" and "iTero Scanners": Invisalign Aligners are transparent and removable dental aligners made from clear plastic and are custom-manufactured by the Defendant. iTero Scanners are hand-held digital intraoral scanners used to generate dental mouth scans to custom-order Invisalign Aligners.

Case History: In 2019, a class action lawsuit was filed in the District of Delaware alleging the Defendant monopolized the aligner and scanner markets, thereby artificially inflating its prices in both markets for Invisalign Aligners and iTero Scanners in the United States in violation of federal antitrust laws. It is impossible to predict the outcome, but money may become available to eligible class members if the class is certified and a settlement is reached with the Defendant in the future.

**If a monetary settlement is obtained, information about it will be available from Class Counsel.

Please understand that you have the right to file on your own if and when there is a monetary settlement.
