Case History

In 2024, a class action lawsuit was filed alleging Toyota engaged in improper conduct related to emissions certification for certain Toyota IC Forklifts sold in the United States in violation of state and federal laws. At this time, the class has entered into a settlement with the Defendants for approximately \$299.5 million and other relief (this settlement is pending final approval). The settlement funds (less any expenses and fees) will be distributed if and when the Court grants final approval of the settlement, and a claims process is completed.
